What's New on WPN

By Norm Weinberg

ONE OF THE MOST VALUABLE FEATURES OF THE WORLD Percussion Network is its file transfer system. With file transfer, the WPN gives you the ability to transmit files of any type from one computer to another over the telephone.

USING THE FILE TRANSFER SYSTEM

To use the file transfer system, log in to the WPN as you would normally, and execute the FILES command by typing "F". You'll see a message indicating that the files system is active, followed by a text message offering a brief description of the FILES area

FILES SYSTEM COMMANDS

Accessing the FILES system presents you with a new command prompt and a new set of commands. The new prompt works the same way as the WPN's main command prompt; it allows you to enter commands by typing the first letter of the command or by scrolling through the commands with the spacebar and backspace keys (if you're using the ANSI display). Don't forget that you can access the "Help" command at any time, and it will display an explanation of each command when the F1 key is pressed. Any time you wish to return to the message area of the WPN, use the "Quit" command (type "Q").

Just as the WPN stores information in various subboards, different types of files are kept in separate directories. At this time, the WPN has the following directories:

DIRECTORY	TYPES OF FILES
ARTICLES	Article Reprints from Publications
CATALOGS	Manufactures/Publishers Catalogs
COMM	Communications Programs
EXCHANGE	Users' Files Exchange Area
LIBRARY	Text Files & Papers
MACMUSIC	Musical Applications for MACS
MACUTIL	Utility Programs for MACS
MIDIMIDI	Apps. and Sample Files
MUSIC	Music Apps. for IBM Compatibles
UPLOADS	New UPLOADS
UTILDOS	Utility Programs

Below is a selected listing of files currently in the World Percussion Network. For more specific information on downloading or uploading data, please refer to the Guide published in the March issue of *Percussion News*. Hope to see you all online soon!
